

S.K. Trading & Co.

Supplier & Stockiest of Valves, Pipes & Fittings

Best Industrial Solutions

The SK Trading & Company

We are proudly associated with top-tier government bodies like MJP, MIDC, CIDCO, and several Municipal Corporations. Our mission is to deliver top-notch industrial products with zero compromise on safety or service quality.

THE **S. K. TRADING** WAY

S. K. Trading & Co. was founded on a commitment to quality, trust, and industry expertise. Our approach to business is guided by integrity and performance. From sourcing and stocking to on-time delivery and after-sales support, every process is built on precision and care. Whether supplying CI/DI/MS Pipes, Mechanical Joints, or Industrial Valves, we ensure compliance with the highest technical standards. Our focus is on providing seamless infrastructure solutions to government bodies, contractors, and industrial clients across Maharashtra and beyond.

"Wherever quality is the criteria, people choose our name."

That's not just our belief—it's our brand promise.

We don't just deliver products; we deliver performance.

Our experts are trained to understand system compatibility, specifications, and end-use scenarios to suggest the best-fit solution—from installation to replacement. Whether you're working on a municipal water supply project or a private infrastructure upgrade, we're your reliable supply chain backbone.

OUR CORE VALUES

SAFETY

We value safety in every delivery, connection, and installation.

QUALITY

Precision-manufactured, certified fittings and valves.

RELIABILITY

We deliver on time, every time—because we know the project can't wait.

WHY CHOOSE US?

At S.K. Trading & Co., we don't just supply materials—we supply confidence. In an industry where quality, size, and timelines matter, we set ourselves apart with capabilities and service that are hard to match.

Our goal is simple: to provide top-tier industrial pipeline solutions at prices that make sense for contractors, developers, and government departments alike.

Supplier for MJP, MIDC, CIDCO & Municipal Corporations

TESTED QUALITY & SAFETY

We supply only fully tested, certified materials that meet IS/ISO, API and global standards—ensuring every valve, pipe, and fitting is built to perform. With strict quality checks and verified safety compliance, we guarantee reliability in every connection.

LARGE SIZES & READY

From large-diameter ductile iron pipes to custom mechanical joints, we stock rare sizes that most vendors can't offer. Our extensive inventory ensures quick availability for even the most demanding infrastructure needs—no delays, no compromises.

BEST QUALITY AT RIGHT PRICE

We deliver premium-grade materials at competitive rates, enabling companies, contractors, and government bodies to maintain high standards without budget overruns. Quality is our foundation, and affordability is our promise.

VALVES

At S.K. Trading & Co., we supply a wide range of industrial-grade valves tailored for municipal, industrial, and infrastructure applications.

I GATE VALVE

Sizes Available: 15mm to 1200mm [API STD]

Material: Cast Iron, Ductile Iron, Cast Steel

Subtypes:

- Rising Stem Gate Valve
- Non-Rising Stem Gate Valve
- Resilient Seated Gate Valve (RSV)
- Flange End/Buttweld

Applications: Waterworks, treatment plants, irrigation, fire protection

II CHECK VALVE

Sizes Available: 50mm to 1000mm [API STD]

Material: Cast Iron, Cast Steel

Subtypes:

- Swing Type Check Valve
- Wafer Type Check Valve
- Dual Plate Check Valve
- Flange End/Buttweld

Applications: Water supply systems, pumping stations, drainage

III BUTTERFLY VALVE

Sizes Available: 50mm to 1200mm

Material: Cast Iron, Cast Steel

Subtypes:

- Wafer Type
- Lug Type
- Double Flanged
- With Gear / Pneumatic / Electric Actuation

Applications: Industrial plants, HVAC, water treatment

VALVES

At S.K. Trading & Co., we supply a wide range of industrial-grade valves tailored for municipal, industrial, and infrastructure applications.

IV SLUICE VALVE

Sizes Available: 50mm to 1200mm

Material: Cast Iron, Ductile Iron

Subtypes:

- Metal Seated
- Resilient Seated

Applications: Municipal water supply, distribution mains, irrigation networks

V MULTI-DOOR CHECK VALVE

Sizes Available: 400mm to 1000mm

Material: CI/DI with Stainless Steel Internals

Applications: Pumping stations, high-volume pipelines, wastewater systems

VI GLOBE VALVE

Sizes Available: 25mm to 900mm

Material: Cast Steel, Cast Iron,

Subtypes:

- Angle Type
- T-Type
- Y-Type

Applications: Steam lines, chemical processing, power plants

VALVES

At S.K. Trading & Co., we supply a wide range of industrial-grade valves tailored for municipal, industrial, and infrastructure applications.

VII MOTORIZED GATE VALVE

Sizes Available: 80mm to 1000mm

Material: CI/DI body, Stainless Steel trims

Actuation: Electric, Pneumatic, Hydraulic

Applications: SCADA systems, automated water distribution
industrial automation

VIII SAFETY VALVE

Sizes Available: 15mm to 300mm

Material: Bronze, SS, CS, CI

Subtypes:

- Spring-loaded
- Lever type

Applications: Boilers, compressed air systems, pressure vessels

IX BALL VALVE

Sizes Available: 15mm to 600mm

Material: SS304, SS316, CS

Subtypes:

- 2-piece / 3-piece design
- Full bore / Reduced bore
- Flanged / Screwed / Welded ends

Applications: Oil, gas, HVAC, water, chemicals

VI FOOT VALVE

Sizes Available: 40mm to 300mm

Material: Cast Iron

Features:

- Strainer-type inlet
- Heavy-duty spring-loaded disc

Applications: Borewells, tanks, suction lines in
pumping systems

PIPES, JOINTS & FITTINGS

Complete Pipeline Connectivity – Durable, Compatible, and Industry-Compliant

MILD STEEL (MS) PIPES

Size Range: 25mm to 3000mm OD

Material Grades:

IS 1239, IS 3589, ASTM A106, A53

Ends: Plain, Bevelled, Flanged, or Threaded

Applications:

- Underground and overground pipelines
- Water supply, fire-fighting networks
- Oil & gas distribution, irrigation systems

MS Pipes are known for their versatility, weldability, and strength-to-weight ratio—making them ideal for both pressure and non-pressure pipeline systems.

MS DISMANTLING JOINTS

Size Range: 80mm to 2000mm

Material: Mild Steel

Components: Flange Adapter
+ Expansion Piece
+ Tie Rods

Pressure Class: PN10 / PN16 / PN25

Applications:

- Valve chambers
- Pumping stations
- Pipelines requiring future disassembly or realignment

Dismantling joints ensure hassle-free assembly and disassembly of valves, meters, and other components without affecting the pipeline integrity.

FITTINGS

Material Options: DI, MS

Size Range: 50mm to 2000mm

Types:

- **Tee** – For branch line connection (Equal / Reducing Tee)
- **Bend** – For directional change (90°, 45°, 22.5°)
- **Reducer** – For size transitions (Concentric / Eccentric)
- **Flange** – For bolted joint connections (Slip-On, Weld Neck)
- **Strainers** – Prevent debris entry into systems (Y-type / Basket type)

All fittings are pressure-rated and available with test certificates on request.

Trusted Industrial Supply Network

Precision Materials. Certified Quality. Partnered Success.
At S.K. Trading & Co., we understand that every successful project relies on reliable, tested, and timely supply. Our trusted partner network, skilled logistics, and inventory of rare and certified materials make us the go-to vendor for government bodies, contractors, and industrial clients across Maharashtra and beyond.
